

ABSTRACT

A communication device operates in first and second modes, such as a gaming mode and a communication mode. The communication device includes a communication device body adapted for a first mode of operation, a display screen disposed in generally parallel relationship with the device body in the first mode of operation, and a pivoting means
5 disposed between the display screen and the device body for permitting the display screen to pivot into a position generally orthogonal to the device body for the second mode of operation. This Abstract is provided to comply with rules requiring an Abstract that allows a searcher or other reader to quickly ascertain subject matter of the technical disclosure. This Abstract is submitted with the understanding that it will not be used to interpret or limit the
10 scope or meaning of the claims. 37 CFR 1.72(b).
